

## 1 OnnxRT

- o Onnx Run Time (ort) (<https://onnxruntime.ai/>). Choose the platform, API and architecture.
  - > `brew install onnxruntime`
  - > `brew install cmake`
- o The OnnxRT is installed in `/opt/homebrew/Cellar/onnxruntime/`
- o It is necessary to install cmake and opencv

## 2 Last libraries

- o It is necessary to install also `libmbedcrypto.13.dylib`, due to  
Error while run command ffmpeg: Library not loaded: `'/opt/homebrew/opt/mbedtls/lib/libmbedcrypto.13.d`  
`[closed]`.
- o Uninstall both `mbedtls` and `librist` and then reinstall `ffmpeg`:
  - > `brew uninstall librist --ignore-dependencies`
  - > `brew uninstall mbedtls --ignore-dependencies`
  - > `brew reinstall ffmpeg`

## 3 Installations details and paths

- > `brew --version`
- > `cmake --version`
